

Senior Full-Stack SaaS Engineer

We are seeking a highly skilled **Senior Software Engineer** with a proven track record of developing and deploying **SaaS products** at scale. The ideal candidate has **5+ years of professional software development experience**, strong architectural understanding, and the ability to work across the full stack.

Responsibilities

- Design, develop, and maintain scalable SaaS applications
- Build and optimize backend microservices (RESTful APIs, worker processes)
- Develop high-performance, responsive, and accessible web interfaces
- Own features end-to-end: architecture → coding → testing → deployment
- Mentor junior engineers and participate in code reviews
- Implement CI/CD, automated testing, monitoring, and performance improvements
- Ensure clean code practices using OOP, SOLID principles, and design patterns
- Collaborate with product and DevOps teams to ship high-impact features

Required Skills & Qualifications

- **5+ years** experience in production-grade software engineering
- Strong **OOP fundamentals** and software design principles
- Experience developing **SaaS systems** with multitenancy & subscription features
- Proficiency in both frontend and backend development:
 - Backend: Python / Node.js / Java / Go (any strong modern backend language)
 - Frontend: React, Angular, or Vue (modern SPA frameworks)

- Strong understanding of relational and/or NoSQL databases
- Solid CI/CD and DevOps awareness (Docker, Kubernetes preferred)
- Hands-on experience with cloud platforms (AWS / GCP / Azure)
- REST API design and integration
- Strong debugging, testing, and performance optimization skills

Preferred

- Experience with distributed systems and event-driven architecture
- Knowledge of microservices orchestration with message queues
- Familiarity with serverless technologies
- Exposure to security best practices for SaaS platforms (Auth, RBAC, OAuth2)

Soft Skills

- Excellent communication and collaboration
- Ownership mindset and ability to work in dynamic environments
- Proactive problem solver with attention to detail
